

Precision Manufacturing

AS9100, ISO9001, ISO13485 Certified

Founded in 1977 J & J Machine provides CNC machining to several markets. We strive to create a partnership with our customers and assist them from development through production. Our staff has years of experience working with standard and exotic plastics and metals. Our team will help bring your design to reality. Let us put our experience to work for you!

The NTX-2000 integrated mill turn center is designed for machining precision parts for a multitude of industries, which have complex shapes and need high-precision, high efficiency machining.

Kern Micro HD

The KERN Micro HD is the solution for high precision serial and prototype production. It is equipped with 30 internal pallets and nearly 100 tools. It provides absolute reliability and stability over a long machine life.

DMU 125 FD duoBLOCK

The DMU 125 FD duoBLOCK mounts a $\phi 1,250$ mm FD rotary table equipped with the direct drive that is capable of 500 RPM. The model ensures highly stable and highly precise milling and turning.

J & J Machine has experience machining

Metals

Titanium, Kovar, Invar, Hastalloy, Inconel, Nitronic, Silver, Tantalum, Nickel, Copper, Brass, Tungsten, Platinum, Molybdenum, MP35N, Bronze, Steel, Stainless Steel, Aluminum, and several others
